of Liberal Arts and Sciences
Arizona State University

Working together to innovate healthcare

Arizona State University works with a diverse network of biomedical and healthcare institutions. Mayo Clinic is ASU's longest-standing and most comprehensive partnership forging a comprehensive new model for healthcare education and research: The Mayo Clinic and Arizona State University Alliance for Health Care.

Other clinical partners include:

- Banner Health
- Dignity Health - St. Joseph's Hospital and Medical Center / Barrow Neurological Institute
- Flinn Foundation
- HonorHealth
- Maricopa Integrated Health System
- Mayo Clinic / ASU-Mayo Seed Grant Program
- Phoenix Children's Hospital
- Phoenix VA Health Care System
- Translational Genomics Research Institute (TGen)
- University of Arizona

Pursue your passions

At The College of Liberal Arts and Sciences, you'll find personalized pre-health advising and resources to help you master the fundamental course requirements for a successful medical or dental career and conquer the competitive admission process. You are not required to major in a science field to be a pre-medical or pre-dental student and are encouraged to select a major based on interests and passions. Many students choose a degree in biology, chemistry, psychology, physics or engineering, however, it is not unusual for someone who majors in political science, English literature, sociology or a non-science field to be accepted into medical school.

Support for what comes next

Arizona State University's Health Professions Advising provides support to students interested in pursuing careers in medicine (allopathic and osteopathic), chiropractic, dentistry, naturopathic medicine, occupational therapy, optometry, pharmacy, physical therapy, physician assistant, podiatric medicine and veterinary medicine. No matter your dream path, our pre-health advisors can help you determine which courses satisfy requirements, navigate the complexities of admission and prepare for your required examinations.

The College's pre-health advisors can also help with:

- Incorporating a study abroad experience
- Gaining research and internship opportunities
- Admission test assistance
- Application preparation
- Health-related experience
- Letters of recommendation
- Major and course selection
- School selection assistance
- Scholarship and wait-list advising
- And so much more

Feel prepared and well-rounded

Marfatia is studying biological sciences in The College of Liberal Arts and Sciences with a goal to study medicine and one day work for a healthcare organization. She said attending the pre-health 101 workshop helped her gain information about pre-requisites for medical school as well as the different career opportunities ahead. "I learned a lot from the workshop and got a better understanding of the requirements and fields that are open for me," she said.

"I was always into science and after all these years I realized that the human body intrigues me the most— I love to gain a deep understanding of how things in our surroundings affect our body. I have thoroughly enjoyed ASU's pre-health track so far and love how it prepares me to become a well-rounded person."

— Palak Marfatia
